RT-qPCR Lyo-Ready Mix #4501

Product Name RT-qPCR Lyo-Ready Mix

Catalog Number #4501

Description RT-qPCR Lyo-Ready Mix is a universal probe mix that allows robust, sensitive, and fast RT-qPCR for the detection of single or multiplex RNA or DNA targets. RT-qPCR Lyo-Ready Mix contains optimized excipients, buffer, PCR enhancers and an antibody-regulated hot-start Taq DNA polymerase and is ready to be lyophilized to produce stable reagents at room temperature. RT-PCR Lyo-Ready Mix is ready to be lyophilized to produce stable reagents at room temperature. Upon addition of target specific primers/probes and reverse transcriptase (RTase Lyo) to the mastermix, the mixture can be lyophilized directly, without the need to add additional excipients. RT-qPCR Lyo-Ready Mix is compatible with several probes such as TaqMan® and Scorpions®.

**NEW: RTase dilution buffers included into the product.
Easy to use, less hands-on work, less pipetting errors!**
